**Our "Artwork Decisions" caters** to review the artwork of pack labels, version controls, checklist verification with electronic signatures. All the information is managed in a centralized repository. Pharmaceutical and Life Science companies are governed by FDA validation, stringent quality norms and GMP. Miniscule errors can be costly, damaging and puts companies at risk owing to the threat of product recalls, health authority warnings and fines.

Advantages and Challenges mitigated by implementing Artwork Decisions:

✓ Ensure consistency.

✓ Reduces packaging errors & product recalls.

✓ Increases innovation.

✓ Manage packaging projects involving multiple SKUs, dyelines, copy text, translation agencies, pre-press studios, printers and suppliers.

✓ Ensure artwork approval by all relevant stakeholders before releasing for print.

Artwork Decisions is a fully compliant solution for the Life Science Industry with the various regulatory agencies and conform to their standards.

| Initiate artwork projects | → | Attach Files | → | Route to reviewers | → | Approve or Reject Artwork |

| Track status of Artwork | | Receive E-mail Alerts on pending tasks |
